

# Open API Documentation

25.10.2016 Version: 1 Revision: 3

## **Changelog:**

### **Revision 4.1:**

Added new "all\_jobs\_ordered"-endpoint. Added some new attributes for jobs.

### **Revision 3:**

Fixed a mistake in 2nd revision causing the 1st revision country field to become invalid. Please see the differences in the implementation in case you used the 2nd revision. Sorry for the inconvenience.

### **Revision 2:**

Added the country support.

### **Revision 1:**

Initial release

# All open jobs as JSON

Request type: GET

Request URL: [www.fuzu.com/api/all\\_jobs](http://www.fuzu.com/api/all_jobs)

Return type: Array of Job objects (See Object examples)

Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      number_of_positions: 1,
      campaign_start_date: "2015-05-04",
      campaign_end_date: "2016-10-17",
      job_start_date: "2015-05-18",
      job_end_date: null,
      salary_min_cents: 6000000,
      salary_min_currency: "kes",
      salary_max_cents: 8000000,
      salary_max_currency: "kes",
      required_work_experience_months: 60,
      location: "Nairobi",
      description: "Description text as written by the employer",
      responsibilities: "Responsibility text as written by the employer",
      salary_info: "The salary is negotiable and bonuses given to employees with additional of 3% of net profit.",
      url: "http://www.fuzu.com/jobs/customer-service-offices",
      country: "Kenya",
      employer_logo: "",

    },
    {
      Possibly more job objects }
  ]
}
```

# All open jobs posted by a specific employer

Request type: **GET**

Request URL: [www.fuzu.com/api/company/company\\_slug/all\\_jobs](http://www.fuzu.com/api/company/company_slug/all_jobs)

See “**Finding company slug**” To find the needed company slug

Return type: Array of Job objects (**See Object examples**)

Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      number_of_positions: 1,
      campaign_start_date: "2015-05-04",
      campaign_end_date: "2016-10-17",
      job_start_date: "2015-05-18",
      job_end_date: null,
      salary_min_cents: 6000000,
      salary_min_currency: "kes",
      salary_max_cents: 8000000,
      salary_max_currency: "kes",
      required_work_experience_months: 60,
      location: "Nairobi",
      description: "Description text as written by the employer",
      responsibilities: "Responsibility text as written by the employer",
      salary_info: "The salary is negotiable and bonuses given to employees with additional of 3% of net profit.",
      url: "http://www.fuzu.com/jobs/customer-service-offices",
      country: "Kenya",
      employer_logo: "",
      employer_name: "Toyota Kenya Ltd TEST",
      job_level: "Mid-Level",
      country_code: "KE"
      listing_type: "internal",
      area_of_work: "Customer support, client care",
      job_type: "Full Time",
      contract_type: "Permanent"
    },
    Possibly more job objects }
  ]
}
```

Empty request example in case the employer haven't posted any jobs:

```
{  
  "fuzu_api": []  
}
```

## Find all locations where specific employer has open positions

Request type: **GET**

Request URL: [www.fuzu.com/api/company/company\\_slug/locations](http://www.fuzu.com/api/company/company_slug/locations)

See "Finding company slug" To find the required company slug

Return type: **Array of locations**

Successful request example:

```
{  
  "fuzu_api": [  
    {  
      "country_code": "KE",  
      "display_name": "Kenya"  
    },  
    {  
      "country_code": "MW",  
      "display_name": "Malawi"  
    }  
  ]  
}
```

Empty request example in case the employer haven't posted any jobs:

```
{  
  "fuzu_api": []  
}
```

## Find all positions by specific employer in specific locations

Request type: **POST**

Content type: **JSON (application/json)**

Request URL: [www.fuzu.com/api/company/company\\_slug/locations](http://www.fuzu.com/api/company/company_slug/locations)

See “**Finding company slug**” To find the required company slug

Return type: **Array of locations**

### Request example:

```
Content type: JSON (application/json)
{
  "country_codes": ["KE", "MW"]
}
```

Country\_codes is an array of countries you want to fetch the job from. You should first fetch the available positions with “Find all locations where specific employer has open positions” GET call which is documented on the previous page of this documentation.

### Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      employer_logo: "",
      employer_name: "Toyota Kenya Ltd TEST",
      more job object data as specified on the "Object Examples"
    },
    {
      Possibly more job objects
    }
  ]
}
```

Empty request example in case the employer haven't posted any jobs:

```
{  
  "fuzu_api": []  
}
```

## Object examples

### Job object:

**Title:** As shown on the Fuzu page

**Number of positions:** Positions open in this job opening

**Campaign\_start/end\_date:** When the position becomes active/inactive in Fuzu platform

**Job\_start/end\_date:** When the actual job is supposed to start/end

**Salary\_max/min\_cents:** Maximum/Minimum salary in cents

**Salary\_currency:** USD/KES currently. You should expect any currency here

**Required\_work\_experience\_months:** How many months of experience is expected

**Location:** City where the job is located.

**Description:** Job description as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

**Responsibilities:** Responsibilities text as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

**Salary info:** Responsibilities text as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

**URL:** URL to the job posting.

**Country:** Country where the job is located. When querying for jobs from certain country you should use the "code" part here.

**Country\_code:** 2-digit ISO country code.

**Employer\_logo:** URL to the employers logo if specified

**Employer\_name:** Name of the company who posted the job opening

**Job\_level:** Entry-level, mid-level, or Senior

**Styled\_flow\_url:** Link to the styled flow. If you have purchased a flow that matches your normal recruit site please use this one instead. The link keeps working even after the purchase expires, but doesn't use the custom CSS we have created for your campaign.

**Listing\_type:** Does job seeker apply for the position internally on the Fuzu-site or externally via 3rd-party-site/e-mail/mail.

**Area\_of\_work:** In which area of work the position is set.

**Job\_type:** Full time or part time position.

**Contract\_type:** Permanent or temporary contract.

You should expect only **Title, Description and URL**. Currently we have couple more necessary fields, but to keep the API as future proof as possible we ask you to check the presence of the fields.

## Finding company slug

1: Navigate to the some job opening your company has posted and click the company name on the right hand side of the page. In this image it's "Company name"

The screenshot shows the Fuzu website interface. At the top, there is a navigation bar with the Fuzu logo on the left, a 'Fuzu for employers' button in the center, and 'Create account' and 'Log in' buttons on the right. Below the navigation bar is a secondary menu with links for 'Home', 'Jobs', 'My career', 'Learn', 'News', and 'Check out Fuzu Blog'. The main content area is divided into two columns. The left column features a job listing for 'Director Training in Nairobi'. It includes a warning that the user has 49 days left to apply, a location tag for Nairobi, a verification badge from Fuzu, and buttons for 'Click to apply' and 'Share On Facebook'. Below the job listing is a 'Job Summary' section with a paragraph of text. The right column contains a 'Company name' section with details like 'Computers, software development and services' and 'Company size: 1000+ people'. Below this is a section titled 'Other Jobs at Company Name' which lists three other job openings: 'General Manager - Sales Uganda' (Nairobi), 'Account Executive' (Nairobi), and 'Technical Consultant (NAV)' (Nairobi). At the bottom of this list is 'SAP Sales Lead'.

Alternative 1:

Login to your Employer account and click the companys name on the top bar. In this case IT Service Ltd. TEST

The screenshot shows the Fuzu dashboard. At the top is a yellow navigation bar with the Fuzu logo and a settings icon. Below it is a dark grey navigation menu with links for Home, Campaigns, Talent hub, News, Admin, and Create Campaign. The main header area includes a profile section for 'IT Service Ltd. TEST' with an account settings icon, and three notification boxes: 'New messages' (0), 'Active campaigns' (3), and 'Manage users' (5). The main content area is titled 'Welcome to Fuzu!' and features three white cards with blue headers and green buttons: 'Campaign' (Start a new campaign), 'Talent Search' (Search for talent now), and 'Company Page' (Create recruitment page). Each card contains a brief description of the feature. At the bottom of the dashboard, there are two sections: 'My campaigns' and 'Saved talent searches'.

2: Now look at the URL: [www.fuzu.com/company/company-name](http://www.fuzu.com/company/company-name)  
In this case the company slug is “company-name”
