

# Open API Documentation

25.10.2016 Version: 1 Revision: 4.2

## **Changelog:**

### **Revision 4.2:**

Added new attribute 'responsibilities\_raw', raw responsibilities text with html tags

### **Revision 4.1:**

Added new "all\_jobs\_ordered"-endpoint. Added some new attributes for jobs.

### **Revision 3:**

Fixed a mistake in 2nd revision causing the 1st revision country field to become invalid. Please see the differences in the implementation in case you used the 2nd revision. Sorry for the inconvenience.

### **Revision 2:**

Added the country support.

### **Revision 1:**

Initial release

# All open jobs as JSON

Request type: GET

Request URL: [www.fuzu.com/api/all\\_jobs](http://www.fuzu.com/api/all_jobs)

Return type: Array of Job objects (See Object examples)

Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      number_of_positions: 1,
      campaign_start_date: "2015-05-04",
      campaign_end_date: "2016-10-17",
      job_start_date: "2015-05-18",
      job_end_date: null,

}
```

## All open jobs in order

All open jobs, Fuzu exclusive jobs first from closing first to closing last, then all the other jobs from closing first to closing last.

Request type: **GET**

Request URL: [www.fuzu.com/api/all\\_jobs\\_ordered](http://www.fuzu.com/api/all_jobs_ordered)

Return type: Array of Job objects (**See Object examples**)

Successful request example:

```
{  
  fuzu_api:  
  [  
    {  
      title: "Customer Service Officer",  
      number_of_positions: 1,  
      campaign_start_date: "2015-05-04",  
      campaign_end_date: "2016-10-17",  
      job_start_date: "2015-05-18",  
      job_end_date: null,  
      salary_min_cents: 6000000,  
      salary_min_currency: "kes",  
      salary_max_cents: 8000000,  
      salary_max_currency: "kes",  
      required_work_experience_months: 60,  
      location: "Nairobi",  
      description: "Description text as written by the employer",  
      responsibilities: "Responsibility text as written by the employer",  
      salary_info: "The salary is negotiable and bonuses given to employees  
with additional of 3% of net profit.",  
      url: "http://www.fuzu.com/jobs/customer-service-offices",  
      country: "Kenya",  
      employer_logo: "",  
      employer_name: "Toyota Kenya Ltd TEST",  
      job_level: "Mid-Level",  
      country_code: "KE"  
      listing_type: "internal",  
      area_of_work: "Customer support, client care",  
      job_type: "Full Time",  
      contract_type: "Permanent",  
      responsibilities_raw: "Responsibility text with html tags"
```

```
    },  
    {  
        Possibly more job objects }  
    ]  
}
```

## All open jobs posted by a specific employer

Request type: **GET**

Request URL: [www.fuzu.com/api/company/company\\_slug/all\\_jobs](http://www.fuzu.com/api/company/company_slug/all_jobs)

See “**Finding company slug**” To find the needed company slug

Return type: Array of Job objects (**See Object examples**)

Successful request example:

```
{  
  fuzu_api:  
  [  
    {  
      title: "Customer Service Officer",  
      number_of_positions: 1,  
      campaign_start_date: "2015-05-04",  
      campaign_end_date: "2016-10-17",  
      job_start_date: "2015-05-18",  
      job_end_date: null,  
      salary_min_cents: 6000000,  
      salary_min_currency: "kes",  
      salary_max_cents: 8000000,  
      salary_max_currency: "kes",  
      required_work_experience_months: 60,  
      location: "Nairobi",  
      description: "Description text as written by the employer",  
      responsibilities: "Responsibility text as written by the employer",  
      salary_info: "The salary is negotiable and bonuses given to employees with additional of 3% of net profit.",  
      url: "http://www.fuzu.com/jobs/customer-service-offices",  
      country: "Kenya",  
      employer_logo: "",  
      employer_name: "Toyota Kenya Ltd TEST",  
      job_level: "Mid-Level",  
      country_code: "KE"  
    }  
  ]  
}
```

```
        listing_type: "internal",
        area_of_work: "Customer support, client care",
        job_type: "Full Time",
        contract_type: "Permanent",
        responsibilities_raw: "Responsibility text with html tags"
    },
    {
        // Possibly more job objects
    }
]
}
```

Empty request example in case the employer haven't posted any jobs:

```
{
  fuzu_api: [ ]
}
```

## Find all locations where specific employer has open positions

Request type: **GET**  
Request URL: [www.fuzu.com/api/company/company\\_slug/locations](http://www.fuzu.com/api/company/company_slug/locations)  
See "Finding company slug" To find the required company slug  
Return type: **Array of locations**  
Successful request example:

```
{
  "fuzu_api": [
    {
      "country_code": "KE",
      "display_name": "Kenya"
    },
    {
      "country_code": "MW",
      "display_name": "Malawi"
    }
  ]
}
```

Empty request example in case the employer haven't posted any jobs:

```
{  
  "fuzu_api": []  
}
```

## Find all positions by specific employer in specific locations

Request type: **POST**

Content type: **JSON (application/json)**

Request URL: [www.fuzu.com/api/company/company\\_slug/locations](http://www.fuzu.com/api/company/company_slug/locations)

See “**Finding company slug**” To find the required company slug

Return type: **Array of locations**

### Request example:

```
Content type: JSON (application/json)  
{  
  "country_codes": ["KE", "MW"]  
}
```

Country\_codes is an array of countries you want to fetch the job from. You should first fetch the available positions with “Find all locations where specific employer has open positions” GET call which is documented on the previous page of this documentation.

### Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      employer_logo: "",
      employer_name: "Toyota Kenya Ltd TEST",
      more job object data as specified on the "Object Examples"
    },
    {
      Possibly more job objects
    }
  ]
}
```

Empty request example in case the employer haven't posted any jobs:

```
{
  fuzu_api: [ ]
}
```

## Object examples

### Job object:

**Title:** As shown on the Fuzu page

**Number of positions:** Positions open in this job opening

**Campaign\_start/end\_date:** When the position becomes active/inactive in Fuzu platform

**Job\_start/end\_date:** When the actual job is supposed to start/end

**Salary\_max/min\_cents:** Maximum/Minimum salary in cents

**Salary\_currency:** USD/KES currently. You should expect any currency here

**Required\_work\_experience\_months:** How many months of experience is expected

**Location:** City where the job is located.

**Description:** Job description as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

**Responsibilities:** Responsibilities text as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

**Salary info:** Responsibilities text as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

**URL:** URL to the job posting.

**Country:** Country where the job is located. When querying for jobs from certain country you should use the "code" part here.

**Country\_code:** 2-digit ISO country code.

**Employer\_logo:** URL to the employers logo if specified

**Employer\_name:** Name of the company who posted the job opening

**Job\_level:** Entry-level, mid-level, or Senior

**Styled\_flow\_url:** Link to the styled flow. If you have purchased a flow that matches your normal recruit site please use this one instead. The link keeps working even after the purchase expires, but doesn't use the custom CSS we have created for your campaign.

**Listing\_type:** Does job seeker apply for the position internally on the Fuzu-site or externally via 3rd-party-site/e-mail/mail.

**Area\_of\_work:** In which area of work the position is set.

**Job\_type:** Full time or part time position.

**Contract\_type:** Permanent or temporary contract.

**Responsibilities\_raw:** Raw responsibilities text typed by the employer with html tags.

You should expect only **Title, Description and URL**. Currently we have couple more necessary fields, but to keep the API as future proof as possible we ask you to check the presence of the fields.

## Finding company slug

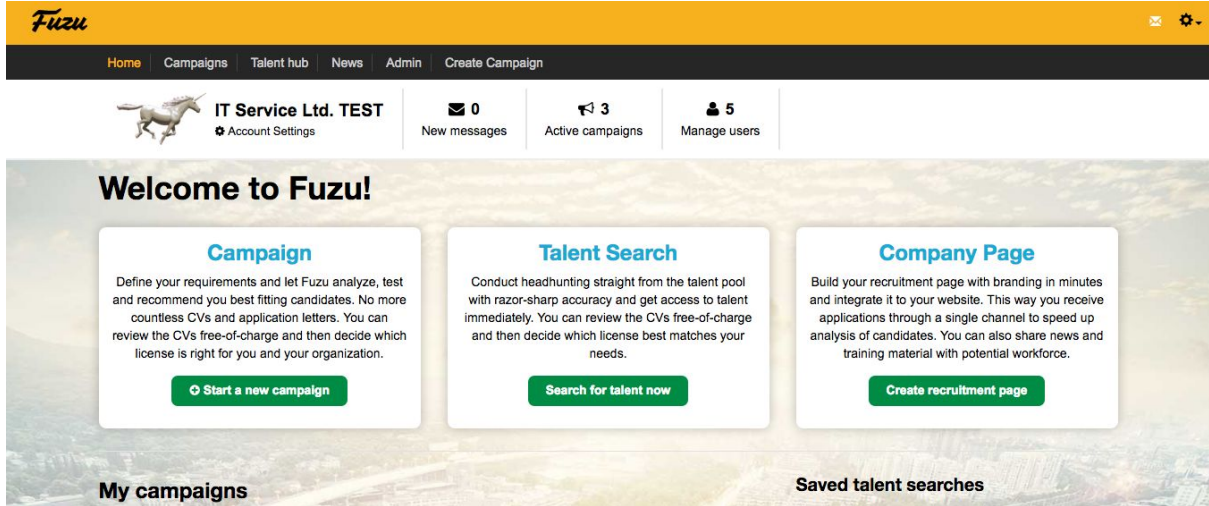

1: Navigate to the some job opening your company has posted and click the company name on the right hand side of the page. In this image it's "Company name"

The screenshot shows the Fuzu website interface. At the top, there is a navigation bar with the Fuzu logo, a 'Fuzu for employers' button, and 'Create account' and 'Log in' buttons. Below the navigation bar, there is a main content area. On the left, there is a job listing for 'Director Training in Nairobi'. The listing includes a 'Click to apply' button and a 'Share On Facebook' button. On the right, there is a 'Company name' section with details like 'Computers, software development and services' and 'Company size: 1000+ people'. Below that, there is a section for 'Other Jobs at Company Name' listing roles like 'General Manager - Sales Uganda', 'Account Executive', 'Technical Consultant (NAV)', and 'SAP Sales Lead'.

**Alternative 1:**

**Login to your Employer account and click the company's name on the top bar. In this case IT Service Ltd. TEST**

**2: Now look at the URL: [www.fuzu.com/company/company-name](http://www.fuzu.com/company/company-name)  
In this case the company slug is “company-name”**
