

Open API Documentation

25.10.2016 Version: 1 Revision: 5

Changelog:

Revision 5:

Added new endpoints for listing private jobs of an organization for intranet implementations.

Revision 4.2:

Added new attribute 'responsibilities_raw', raw responsibilities text with html tags

Revision 4.1:

Added new "all_jobs_ordered"-endpoint. Added some new attributes for jobs.

Revision 3:

Fixed a mistake in 2nd revision causing the 1st revision country field to become invalid.

Please see the differences in the implementation in case you used the 2nd revision. Sorry for the inconvenience.

Revision 2:

Added the country support.

Revision 1:

Initial release

All open jobs as JSON

Request type: GET

Request URL: www.fuzu.com/api/all_jobs

Return type: Array of Job objects (See Object examples)

Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      number_of_positions: 1,

contract_type: "Permanent",
responsibilities_raw: "Responsibility text with html tags"
},
{
Possibly more job objects }
]
}
```

All open jobs posted by a specific employer

Request type: **GET**

Request URL: www.fuzu.com/api/company/company_slug/all_jobs

See **“Finding company slug”** To find the needed company slug

Return type: Array of Job objects (**See Object examples**)

Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      number_of_positions: 1,
      campaign_start_date: "2015-05-04",
      campaign_end_date: "2016-10-17",
      job_start_date: "2015-05-18",
      job_end_date: null,
      salary_min_cents: 6000000,
      salary_min_currency: "kes",
      salary_max_cents: 8000000,
      salary_max_currency: "kes",
      required_work_experience_months: 60,
      location: "Nairobi",
      description: "Description text as written by the employer",
      responsibilities: "Responsibility text as written by the employer",
    }
  ]
}
```

```
    salary_info: "The salary is negotiable and bonuses given to employees with additional of 3% of net profit.",
    url: "http://www.fuzu.com/jobs/customer-service-offices",
    country: "Kenya",
    employer_logo: "",
    employer_name: "Toyota Kenya Ltd TEST",
    job_level: "Mid-Level",
    country_code: "KE"
    listing_type: "internal",
    area_of_work: "Customer support, client care",
    job_type: "Full Time",
    contract_type: "Permanent",
    responsibilities_raw: "Responsibility text with html tags"
  },
  {
    // Possibly more job objects }
]
}
```

Empty request example in case the employer haven't posted any jobs:

```
{
  fuzu_api: [ ]
}
```

Find all locations where specific employer has open positions

Request type: **GET**

Request URL: www.fuzu.com/api/company/company_slug/locations

See "Finding company slug" To find the required company slug

Return type: **Array of locations**

Successful request example:

```
{
  "fuzu_api": [
    {
      "country_code": "KE",
      "display_name": "Kenya"
    },
    {

```

```
"country_code": "MW",  
"display_name": "Malawi"  
}  
]  
}
```

Empty request example in case the employer haven't posted any jobs:

```
{  
  "fuzu_api": []  
}
```

Find all positions by specific employer in specific locations

Request type: **POST**

Content type: **JSON (application/json)**

Request URL: www.fuzu.com/api/company/company_slug/locations

See “**Finding company slug**” To find the required company slug

Return type: **Array of locations**

Request example:

```
Content type: JSON (application/json)  
{  
  "country_codes": ["KE", "MW"]  
}
```

Country_codes is an array of countries you want to fetch the job from. You should first fetch the available positions with “Find all locations where specific employer has open positions” GET call which is documented on the previous page of this documentation.

Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      employer_logo: "",
      employer_name: "Toyota Kenya Ltd TEST",
      more job object data as specified on the "Object Examples"
    },
    {
      Possibly more job objects
    }
  ]
}
```

Empty request example in case the employer haven't posted any jobs:

```
{
  fuzu_api: [ ]
}
```

All open jobs visible for specific organization

For intranet implementations for example.

Request type: **GET**

Request URL: www.fuzu.com/api/company/company_slug/key/api_key/all_jobs

See “**Finding company slug**” To find the needed company slug

API key can be found from company settings.

Return type: Array of Job objects (**See Object examples**)

Successful request example:

```
{
  fuzu_api:
  [
    {
      title: "Customer Service Officer",
      number_of_positions: 1,
      campaign_start_date: "2015-05-04",
      campaign_end_date: "2016-10-17",
      job_start_date: "2015-05-18",
      job_end_date: null,
      salary_min_cents: 6000000,
      salary_min_currency: "kes",
      salary_max_cents: 8000000,
      salary_max_currency: "kes",
      required_work_experience_months: 60,
      location: "Nairobi",
      description: "Description text as written by the employer",
      responsibilities: "Responsibility text as written by the employer",
      salary_info: "The salary is negotiable and bonuses given to employees with additional of 3% of net profit.",
      url: "http://www.fuzu.com/jobs/customer-service-offices",
      country: "Kenya",
      employer_logo: "",
      employer_name: "Toyota Kenya Ltd TEST",
      job_level: "Mid-Level",
      country_code: "KE"
      listing_type: "internal",
      area_of_work: "Customer support, client care",
      job_type: "Full Time",
      contract_type: "Permanent",
      responsibilities_raw: "Responsibility text with html tags"
    },
    {
      Possibly more job objects }
  ]
}
```

Find all locations where specific organization has open positions visible

Request type: **GET**

Request URL: www.fuzu.com/api/company/company_slug/key/api_key/locations

See “Finding company slug” To find the required company slug

API key can be found from company settings.

Return type: **Array of locations**

Successful request example:

```
{
  "fuzu_api": [
    {
      "country_code": "KE",
      "display_name": "Kenya"
    },
    {
      "country_code": "MW",
      "display_name": "Malawi"
    }
  ]
}
```

Find all positions visible for specific organization in specific locations

Request type: **POST**

Content type: **JSON (application/json)**

Request URL: www.fuzu.com/api/company/company_slug/key/api_key/locations

See “**Finding company slug**” To find the required company slug

API key can be found from company settings.

Return type: **Array of locations**

Request example:

```
Content type: JSON (application/json)
{
  "country_codes": ["KE", "MW"]
}
```

Country_codes is an array of countries you want to fetch the job from. You should first fetch the available positions with “Find all locations where specific organization has open positions” GET call which is documented on the previous page of this documentation.

Successful request example:

```
{
  fuzu_api:
  [
    {

    },
    {
      Possibly more job objects
    }
  ]
}
```

Object examples

Job object:

Title: As shown on the Fuzu page

Number of positions: Positions open in this job opening

Campaign_start/end_date: When the position becomes active/inactive in Fuzu platform

Job_start/end_date: When the actual job is supposed to start/end

Salary_max/min_cents: Maximum/Minimum salary in cents

Salary_currency: USD/KES currently. You should expect any currency here

Required_work_experience_months: How many months of experience is expected

Location: City where the job is located.

Description: Job description as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

Responsibilities: Responsibilities text as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

Salary info: Responsibilities text as shown on the Fuzu platform. These are typed by the employer and might be pretty long in some cases. Truncate them if necessary

URL: URL to the job posting.

Country: Country where the job is located. When querying for jobs from certain country you should use the “code” part here.

Country_code: 2-digit ISO country code.

Employer_logo: URL to the employers logo if specified

Employer_name: Name of the company who posted the job opening

Job_level: Entry-level, mid-level, or Senior

Styled_flow_url: Link to the styled flow. If you have purchased a flow that matches your normal recruit site please use this one instead. The link keeps working even after the purchase expires, but doesn't use the custom CSS we have created for your campaign.

Listing_type: Does job seeker apply for the position internally on the Fuzu-site or externally via 3rd-party-site/e-mail/mail.

Area_of_work: In which area of work the position is set.

Job_type: Full time or part time position.

Contract_type: Permanent or temporary contract.

Responsibilities_raw: Raw responsibilities text typed by the employer with html tags.

You should expect only **Title, Description and URL**. Currently we have couple more necessary fields, but to keep the API as future proof as possible we ask you to check the presence of the fields.

Finding company slug

1: Navigate to the some job opening your company has posted and click the company name on the right hand side of the page. In this image it's "Company name"

The screenshot shows the Fuzu website interface. At the top, there's a navigation bar with the Fuzu logo, a 'Fuzu for employers' button, and 'Create account' and 'Log in' buttons. Below the navigation bar, there's a menu with 'Home', 'Jobs', 'My career', 'Learn', 'News', and 'Check out Fuzu Blog'. The main content area is divided into two columns. The left column features a job listing for 'Director Training in Nairobi'. It includes a warning that the user has 49 days left to apply, a verification badge from Fuzu, and buttons for 'Click to apply' and 'Share On Facebook'. Below the job listing is a 'Job Summary' section. The right column contains a 'Company name' section with details like 'Computers, software development and services' and 'Company size: 1000+ people'. Below that is a section titled 'Other Jobs at Company Name' which lists several other roles: 'General Manager - Sales Uganda', 'Account Executive', 'Technical Consultant (NAV)', and 'SAP Sales Lead', each with a location indicator for Nairobi.

Alternative 1:

Login to your Employer account and click the company's name on the top bar. In this case IT Service Ltd. TEST

**2: Now look at the URL: www.fuzu.com/company/company-name
In this case the company slug is “company-name”**
